PART NAMES

HOW TO USE

1.Put this product on a horizontal position, remove the upper vertical direction.Fig.1.

2.Connect the AC adaptor to the DC jack on the bottom of base.

3.① Add water to the tank. Pay attention to water level and do not exceed maximum level on water tank(Do not use water hotter than 45 ° C, to prevent damaging the atomizer; Do not use dirty water to prevent clogging and damaging the atomizer).

② Drop essential oil into water tank vertically. Quantity should be about 2-3 drops (about 0.1 – 0.15 ml. Use only water-soluble essential oils to guarantee good aroma-diffusion effect.) Fig. 3.

4.Replace the upper to the original position. Fig. 4.

Note:

You must close the upper when you want to use the product.

5. Press "MIST" button to choose your desired mode. Short press the "MIST" button to choose the timer from 1H/3H or ON. Keep pressing the "MIST" button over 5 seconds to choose the spray output between strong or small. Fig. 5.

Tips: The machine would be automatically detect water shortage and power-off protection.

6. "LIGHT" button (WIFI paring button).

① Press the "LIGHT" button to turn on the LED light, the color will change automatically. Press the "LIGHT" button again to fix the color. Fig. 6.

② WIFI paring function: Press and hold down "LIGHT" button, WIFI connection mode is on. If the WIFI indicator is always on, WIFI is in normal mode. If the WIFI indicator flashes, WIFI is into the pairing mode.

IMPORTANT TIPS:

Mist quantity gradually increases as water level decreases. However, when water reaches 1/3 water level, mist quantity begins reducing. This is normal, and is not a device malfunction. When water is completely depleted, the device turns off automatically and the indicator light goes out.
