Network / Systems Administrator

Kingston

Kingston Online Services is a privately held company, operated entirely by people living in the communities it services. We are pleased to support the community and its interests, as we have for decades. KOS' owners contribute to activities within the area, including select sports, hobbies and amateur racing. KOS has continued to grow into new technologies, and is now a trusted provider of Wireless and Cable solutions to customers in most of South Eastern Ontario. To learn more about us please visit us at: www.kos.net

We are looking for a for someone with a true passion for technology…you may not have a ton of certifications, but have been tinkering with computers since you were in school. If you can perform the duties and meet the qualifications listed below we would like to hear from you!

Responsibilities

- Manage servers and their associated operating systems and software. Maintain hardware, equipment and network components.
- Monitoring, configuring, and deploying hardware (Linux servers, switches, routers, firewall)
- Perform network design and capacity planning. Develop, implement and maintain best practice guidelines and checklists for network administration and disaster recovery.
- Implement and/or oversee the installation, configuration, maintenance and troubleshooting of networking hardware, servers, workstations, software and peripheral devices.
- Practice network asset management, including maintenance of network components.
- Interact directly with customers both in person and over the phone for escalated technical issues

Qualifications:

- Proven 3 years workplace experience in system administration or network administration.
- **Proficiency Linux (administration, maintenance, troubleshooting, monitoring, scripting).**
- Experience and knowledge of storage and server virtualization (VMware)
- Experience and knowledge with Cisco networking equipment
- Knowledge of system vulnerabilities and security issues
- Strong understanding of network: IP, TCP, UDP, firewalls, LAN/Internet routing, VPNs, NAT, DNS
- Resourcefulness and problem-solving aptitude.
- Disciplined and methodical, pay attention to details.
