

Difficulties with U-Value & SHGC calculations and reports for Building Council submission?
Struggling to freely design cost effective windows & doors for compliant buildings?

There is a design solution!

Crealco U-Solve is the only Agrément certified design software that calculates actual certified window & door U-Values & SHGC values based on Wispeco's Crealco range of aluminium extrusions.

The FREE U-Solve program includes the following features:

- Uses actual U-Values & SHGC allowing 30% bigger window compliance compare to using default values in SANS 204
- Checks structural and safety glazing compliance (SANS 613 and 10400N) of designs
- Wide range of single and double glazing glass types from PFG, McCoy's and National Glass available to spec and cost
- Estimates Sqm budget costs as you design
- Calculates estimated project budget total in summary reports
- Generates SANS 204 compliance reports for Building Council submission and approval
- Generates detail specification material reports for tender requests - Get what you specify!

Another selection tool for Architects

The Crealco U-Solve Window Economics table assists the architect with the analyses of cost versus thermal performance of Crealco window and door systems.
