

The Loci Collective

Supporting Champion-Led Initiatives

Loci Environment & Place Inc. is a nonprofit change agent supporting practitioners involved in shaping our cities for healthy environments and people

Loci Environment & Place Inc. values and supports champion-led initiatives whenever possible.

Step 1: Is the project compatible with Loci's charter?

Does the project provide opportunities to:

- ☐ seek new **interdisciplinary** solutions with multiple benefits?
- ☐ create **new knowledge** and approaches for better city shaping?
- ☐ share knowledge and support **capacity building** with other city shaping practitioners

If yes for all the above, the project is suitable for Loci.

Step 2: Is Loci able to provide enough time to properly support the initiative?

Does the project:

- ☐ require only a **smaller time commitment** from Loci staff as the 'champion' will meet most of the time resourcing needed?
- ☐ build in **costs to cover additional Loci staff time** on the project?
- ☐ **align directly** with an existing or upcoming Loci commitment thereby not requiring much additional time from Loci staff?
- ☐ bring an **important new focus and value** to Loci that justifies additional staff time to help deliver the project?

If yes for any of these, Loci will be happy to help.

Step 3: Does the 'champion' address the following?

- ☐ Is registered as a Provider Partner in The Loci Collective
- ☐ have a broad methodology outlining how the project could support, and enhance, a 'Loci interdisciplinary multiple-benefits' component
- ☐ Latest CV's of staff that would work on the project
- ☐ Confirmation of adequate insurance coverage
